

100182

9-Bit Wallace Tree Adder

The 100182 is a 9-bit Wallace tree adder. It is designed to assist in performing high-speed hardware multiplication. The device is designed to add 9 bits of data 1-bit-slice wide and handle the carry-ins from the previous slices. The 100182 is easily expanded and still maintains four levels of delay regardless of input string length. In conjunction with the 100183 Recode Multiplier, the 100179 Carry Lookahead, and the 100180 High-speed Adder, the 100182 assists in performing parallel multiplication of two signed numbers to produce a signed twos complement product. See 100183 data sheet for additional information. All inputs have 50 kΩ pull-down resistors.

Rochester Electronics Manufactured Components

Rochester branded components are manufactured using either die/wafers purchased from the original suppliers or Rochester wafers recreated from the original IP. All re-creations are done with the approval of the Original Component Manufacturer (OCM).

Parts are tested using original factory test programs or Rochester developed test solutions to guarantee product meets or exceeds the OCM data sheet.

Quality Overview

- ISO-9001
- AS9120 certification
- Qualified Manufacturers List (QML) MIL-PRF-35835
 - Class Q Military
 - Class V Space Level
- Qualified Suppliers List of Distributors (QSLD)
 - Rochester is a critical supplier to DLA and meets all industry and DLA standards.

Rochester Electronics, LLC is committed to supplying products that satisfy customer expectations for quality and are equal to those originally supplied by industry manufacturers.

The original manufacturer's datasheet accompanying this document reflects the performance and specifications of the Rochester manufactured version of this device. Rochester Electronics guarantees the performance of its semiconductor products to the original OCM specifications. 'Typical' values are for reference purposes only. Certain minimum or maximum ratings may be based on product characterization, design, simulation, or sample testing.

100182

9-Bit Wallace Tree Adder

General Description

The 100182 is a 9-bit Wallace tree adder. It is designed to assist in performing high-speed hardware multiplication. The device is designed to add 9 bits of data 1-bit-slice wide and handle the carry-ins from the previous slices. The 100182 is easily expanded and still maintains four levels of delay regardless of input string length. In conjunction with the

100183 Recode Multiplier, the 100179 Carry Lookahead, and the 100180 High-speed Adder, the 100182 assists in performing parallel multiplication of two signed numbers to produce a signed two's complement product. See 100183 data sheet for additional information. All inputs have 50 k Ω pull-down resistors.

Ordering Code: See Section 6

Logic Symbol

TL/F/9874-3

Pin Names	Description
D ₀ -D ₈	Data Inputs
Cl ₁ -Cl ₃ , Cl _{n-2}	Carry Inputs
CO ₁ -CO ₃ , CO _{n+2}	Carry Outputs
PS	Partial Sum Output
PC	Partial Carry Output
