DAC0800/DAC0801/DAC0802 8-Bit Digital-to-Analog Converters

General Description

The DAC0800 series are monolithic 8-bit high-speed current-output digital-to-analog converters (DAC) featuring typical settling times of 100 ns. When used as a multiplying DAC, monotonic performance over a 40 to 1 reference current range is possible. The DAC0800 series also features high compliance complementary current outputs to allow differential output voltages of 20 V_{p-p} with simple resistor loads as shown in *Figure 1*. The reference-to-full-scale current matching of better than ± 1 LSB eliminates the need for full-scale trims in most applications while the nonlinearities of better than $\pm 0.1\%$ over temperature minimizes system error accumulations.

The noise immune inputs of the DAC0800 series will accept TTL levels with the logic threshold pin, V_{LC} , grounded. Changing the V_{LC} potential will allow direct interface to other logic families. The performance and characteristics of the device are essentially unchanged over the full $\pm 4.5V$ to $\pm 18V$ power supply range; power dissipation is only 33 mW with $\pm 5V$ supplies and is independent of the logic input states.

The DAC0800, DAC0802, DAC0800C, DAC0801C and DAC0802C are a direct replacement for the DAC-08, DAC-08A, DAC-08C, DAC-08E and DAC-08H, respectively.

Features

- Fast settling output current: 100 ns
- Full scale error: ± 1 LSB
- Nonlinearity over temperature: $\pm 0.1\%$
- Full scale current drift: ± 10 ppm/ $^{\circ}C$
- High output compliance: $-10V$ to $+18V$
- Complementary current outputs
- Interface directly with TTL, CMOS, PMOS and others
- 2 quadrant wide range multiplying capability
- Wide power supply range: $\pm 4.5V$ to $\pm 18V$
- Low power consumption: 33 mW at $\pm 5V$
- Low cost

Typical Applications

FIGURE 1. ± 20 V_{p-p} Output Digital-to-Analog Converter (Note 5)

Ordering Information

| Non-Linearity | Temperature Range | Order Numbers | | | | |
|-----------------|--|---------------------------|----------|---------------------------|-------------------|------------|
| | | J Package (J16A) (Note 1) | | N Package (N16A) (Note 1) | SO Package (M16A) | |

Note 2: Absolute Maximum Ratings indicate limits beyond which damage to the device may occur. DC and AC electrical specifications do not apply when operating the device beyond its specified operating conditions.

Note 3: The maximum junction temperature of the DAC0800, DAC0801 and DAC0802 is 125°C. For operating at elevated temperatures, devices in the Dual-In-Line J package must be derated based on a thermal resistance of 100°C/W, junction-to-ambient, 175°C/W for the molded Dual-In-Line N package and 100°C/W for the Small Outline M package.

Note 4: Human body model, 100 pF discharged through a 1.5 kΩ resistor.

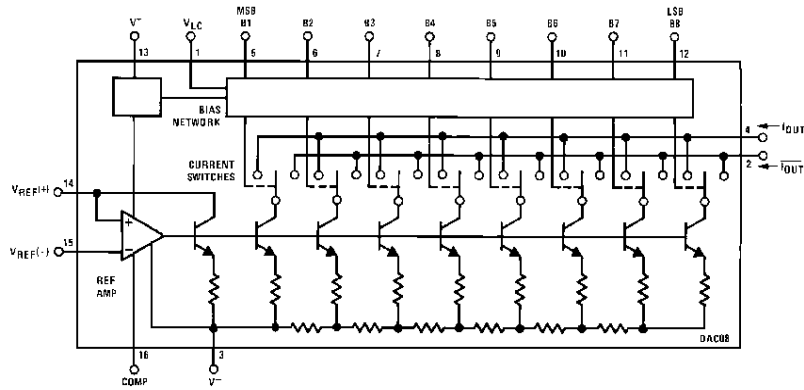

Note 5: Pin-out numbers for the DAC080X represent the Dual-In-Line package. The Small Outline package pin-out differs from the Dual-In-Line package.

FIGURE 2.

Typical Applications

DS005665-5

$$I_{FS} \approx \frac{+V_{REF}}{R_{REF}} \times \frac{255}{256}$$

$I_O + \bar{I}_O = I_{FS}$ for all logic states
 For fixed reference, TTL operation, typical values are:
 $V_{REF} = 10.000V$
 $R_{REF} = 5.000k$
 $R15 = R_{REF}$
 $C_C = 0.01 \mu F$
 $V_{LC} = 0V$ (Ground)

FIGURE 3. Basic Positive Reference Operation (Note 5)

LIFE SUPPORT POLICY

NATIONAL'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF NATIONAL SEMICONDUCTOR CORPORATION. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
